Find at least six differences in details between panels.

by **Terry Stickels**

Since the Earth takes $365 \frac{1}{4}$ days to complete its path around the sun, we add an extra day to the calendar every fourth year to compensate for this, and call it a leap year.

Looking beyond every four years, what do you guess happens to the leap year every four centuries?

©2026 King Features Syndicate

Each numbered row contains two clues and two 6-letter answers. The two answers differ from each other by only one letter, which has already been inserted. For example, if you exchange the A from MASTER for an I, you get MISTER. Do not change the order of the letters.
